ATTENTION: Ms. Vicky Sanchez

SUBJECT: Wastewater Discharge Permit
South Cavalcade Site
Houston, Texas

Dear Ms. Sanchez,

Attached, I am sending you EPA pretreatment standards for industrial effluent from existing wooding preserving facilities (40 CFR 429.85). These standards may provide a basis for evaluating our request for a discharge permit dated February 26, 1986. For further information, you may contact Mr. Bill Luthans (214-767-5312) of the Region VI EPA Municipal Permits - Pretreatment Section.

Results of our analytical analysis of a wastewater sample submitted on March 14, 1986 indicate that concentrations are well below the specified maximum effluent standards. If acceptable to the Department, we propose to use the EPA effluent standards and the City of Houston Industrial Waste Ordinance quality standards for permitting and monitoring discharges.

Please call me as soon as you have reviewed our request so we can arrange a meeting with Dr. Garret to discuss this in more detail, and to answer any questions that you may have. Our client will be in town on April 23, 1986 and will be available to attend a meeting.

Sincerely,

McBRIDE-RATCLIFF AND ASSOCIATES, INC.

William R. Tobin
